

OSPREY
Pandion haliaetus

Habitat

Ospreys live along coastlines of oceans, bays, rivers, estuaries, and marshes.

Food

They prefer to eat fish like flounder, bluefish, eel, shad, bass, perch, and herring.

Predators

Osprey chicks are eaten by raccoons, crows, and great horned owls.

Reproduction

They build large nests near fresh or brackish water in tall trees, cliff posts, and telephone poles.

Where are they today?

They can be found in Central Park during their fall migration.
