

**WHITE ASH**  
*Fraxinus americana*

## **Habitat**

In forests with other hardwood trees like maple or beech

## **Ecological Role**

These trees are home for birds and mammals. Grey squirrels, blue jays, mallard ducks, chipmunks and cottontail rabbits eat their acorns.

## **Food**

Sunlight, freshwater, soil

## **Reproduction**

Their winged seed pods are carried by the wind.

## **Where are they today?**

They can be found in Central Park
