

**WHITE OAK**  
*Quercus alba*

### **Habitat**

These tall trees are often found in forests with pine and tulip trees.

### **Food**

Sunlight, fresh water, and soil

### **Ecological role**

These trees are home for birds and mammals. Grey squirrels, blue jays, mallard ducks, chipmunks and cottontail rabbits eat their acorns.

### **Reproduction**

Acorns fall to the ground and are buried by animals.

### **Where are they today?**

They are very common in city parks.
